School of Economics, University of Delhi, India
2004

B A Geography (Rank 1, University Gold Medal)

Kirorimal College, University of Delhi, India
2002

PROFESSIONAL OVERVIEW

With academic training in Geography from the University of Delhi and Urban Planning from the School of Planning and Architecture (SPA), Delhi, and the International Institute of Geo-Information Science and Earth Observation (ITC), the Netherlands, I have long been fascinated in exploring landscapes – both built and natural – to link the present to the past. My work integrates historical narratives, cartography, urban planning, and 3D modelling to visualize the city's transformation over time. Most recently, it has translated into 'Who Dilli' – a web GIS-portal on mid-19th century Delhi. Previously, I have mapped and designed a tree database for Sunder Nursery and the Humayun's Tomb Complex for Aga Khan Trust for Culture (AKTC). I have also provided planning and GIS support to organizations such as German International Cooperation (GIZ), the World Bank, Centre for Urban and Regional Excellence (CURE) and Forum for Organized Resource Conservation and Enhancement (FORCE), Centre for Science and Environment (CSE) and Sustainable Environment and Ecological Development Society (SEEDS) on issues centered on sustainable urban habitat. My interest in Delhi's history has also resulted in translation of two Urdu books into Hindi – Intizar Hussain's '*Dilli tha Jiska Naam*' and Rajendra Lal Handa's '*Dilli jo ek Shahr Tha*'. I intend to delve deeper into the use of digital technologies to visually depict the varied narratives that have and continue to shape the urban.

WORK EXPERIENCE

Centre for Science Humaines (CSH), Delhi

[Cartographic Consultant | October 2025 – present](#)

The consultant is part of a research project focused on mapping inscriptions recorded in select classical books on Delhi such as *Nuskha-e-Hafizuddin* by Hafizuddin Ahmed, *Sair-ul-Manazil* by Mirza Sangeen Baig and *Asar-us-Sanadeed* by Sir Syed Ahmed Khan. The consultant is responsible for:

- Creating a geo-database and mapping the structures where the inscriptions are located on a map of Delhi.
- Exploring historic maps, plans and survey drawings to locate structures which no longer exist.
- Ground-truthing of structures which are extant but not visible on historic maps/contemporary satellite images.

SHORT COURSES

Certificate course ‘Digital Documentation of Built Heritage Batch – 02’

CEPT University, Ahmedabad
July 2023

Certificate course ‘3D Landscapes’

National Institute of Advanced Studies, Bangalore
March 2022

Online certificate course ‘Urban Heritage Conservation: Issues and Challenges

Sardar Vallabh Bhai Patel Institute of Technology, Surat
September 2021

TECHNICAL SKILLS

Remote Sensing & GIS

ArcGIS Pro
ArcGIS Desktop
ArcGIS Online
QGIS
Google Earth Engine

Photogrammetry

Qutub Commons Initiative: Ecological Regeneration and Heritage Conservation Management Plan for Mehrauli, Delhi

[Urban Planner and GIS Analyst | June 2025 – present](#)

With a focus on the revival of Qutb Sahib’s *baoli*, this initiative intends to create a comprehensive heritage conservation management plan for Mehrauli. The consultant is responsible for:

- Creating a geo-database of heritage structures in Mehrauli.
- Geo-referencing historic maps, plans and survey drawings.
- Topographic analysis from historic maps and creation of digital elevation models.
- Creating base map to support socio-economic survey.
- Drafting Terms of Reference (ToR) document for drone survey of the site.

Ecole des Hautes Etudes en Sciences Sociales (EHESS), Paris

[Cartographic Consultant, ‘Mugurba’ The Bureaucratic Rhythms of Imperial Urbanity: Law, Property and Public Life in Mughal South Asia, c. 1650 - 1750 | May 2025 – July 2025](#)

MugUrba examines century-long processes of urbanization that began with the consolidation of the imperial capital of Delhi in the 1650s, and which grew to encompass a dynamic urban triangle, along with the cities of Agra and Mathura situated in the Yamuna river plains. As part of this, the consultant was responsible for:

- Geo-referencing of historic maps of Delhi.
- Digitization of built and water related features from the geo-referenced maps.

The World Bank

[Short Term Consultant, Tamil Nadu Climate Resilient Urban Development Program | October 2021 – June 2025](#)

The World Bank has been supporting urban local bodies in Tamil Nadu in comprehensive urban mapping with a view to improve governance. The consultant, as part of this initiative was responsible for:

- Vetting existing ToRs for this work.
- Analyzing gaps and formulating new ToRs for engaging consultants for city scale property and utility mapping and developing GIS dashboards.

[Short Term Consultant, Urbanization and Access to Affordable Housing: A Comparative Assessment of South Asian Cities | November 2013 – November 2014](#)

As part of South Asian Unit of the World Bank’s work on understanding

TALKS AND PRESENTATIONS

‘The Hill, Forest and a River: The Story of a City’, speaker in a discussion **‘Delhi and its Textured Pasts’** at India International Centre (November 2025).

‘Sheher mein Gaon: Telling Urban-Rural Histories through Oral Narratives’, discussant in a seminar organized by **Centre de Science Humaines**, (October 2025).

‘Waqiat-e-Dehli: The Chronicles of a City’, poster presented at the Born-Digital Collection, Archives and Memory (BDCAM) conference, University of London (April 2025).

‘The Hill, Forest and a River: The Story of a City’, speaker at the Department of Geography, Miranda House, University of Delhi (October 2023).

‘Yamuna ki Dilli’, speaker in a round table discussion on **‘Thanking the River: Meanderings in time and space’**, as part of **Nadi Utsav** organized by **Indira Gandhi National Centre for Arts (IGNCA)**, (September 2023).

‘Telling Stories through Digital Twins’ panelist in a panel discussion on **‘Breaking Barriers: Integrating Arts & Allied Fields’** in a multi-disciplinary symposium on Digital Creativity, Industry and Culture (DCIC), (August 2023).

‘Photogrammetric 3D Modelling of the Built Form’, presentation & hands-on session on photogrammetry in **‘Use of Drones in the study of Urban Form’**, hybrid workshop SPA Delhi (August 2023).

the pattern of urbanization in the region, the consultant was assigned the task of mapping land and housing markets in select cities of India. The work involved:

- Collecting land use samples for Kanpur, Auraiya and Amritsar.
- Analyzing planning related documents
- Preparing thematic maps to show demographic trends and spatial growth of these cities since the early 1990s.

Surbana Jurong & SMEC India Pvt. Ltd.

[GIS Consultant, Masterplan for Bundelkhand Industrial Development Authority \(BIDA\) Jhansi, Uttar Pradesh | August 2024 – March 2025](#)

BIDA is in the process of establishing an industrial township on the outskirts of Jhansi. The consultant was part of the Surbana Jurong team which was hired to create the Masterplan for the area. The work involved:

- Supervising spatial data collection, verifying drone survey data and conducting GIS based site suitability analysis.

Sambhaav Trust

[Honorary Co-Principal Investigator, Documenting the social and geographical dimensions of the endangered art and practice of making hand-made deep artesian wells and shallow percolation wells in the Thar desert, The British Museum’s Endangered Material Knowledge Program \(EMKP\) | October 2023 – September 2024](#)

Over generations, the knowledge of local geology, topography and hydrogeology has evolved into various socio-cultural traditions and a unique multi-tiered water, pasture and food management system. The project explored the vast depths of traditional wisdom and knowledge systems related to shallow and deep well-making named *‘rejwani beri’* and *‘pataali kuan’*, respectively, in the Jaisalmer District of Rajasthan. The honorary co-principal investigator was responsible for:

- Geo-spatial documentation of traditional structures of rainwater harvesting in the Thar desert.
- Creating photogrammetric 3D models of select structures.
- Producing cartographic outputs such as thematic maps.

Aga Khan Trust for Culture (AKTC), New Delhi

[Linguistic consultant for Humayun’s Tomb Museum | September 2021 – March 2024](#)

The Humayun’s Tomb Museum showcases centuries of tangible and intangible cultural heritage that evolved in the area known as

‘The Last Gathering: A vivid portrait of life in the Red Fort’, speaker in a book discussion organized by Centre for Study of Developing Societies (CSDS), (September 2022).

Using Drones to create 2D/3D maps/models of Buildings and Neighborhoods’: presentation in **‘Drones: Steering Way Forward for Architects and Planners**, Online webinar SPA Delhi (August 2022).

‘Introduction to QGIS’, as part of the **‘Induction Training of the Sub-Divisional Officers (SDOs)’**, NIDEM (July 2022).

‘Modelling the Landscape of Sunder Nursery: A GIS Approach’, an online talk delivered to Landscape Architecture Department, SPA Vijaywada (May 2022).

‘Modelling Cultural Heritage for Urban Planning: A Case of Shahjahanabad/Old Delhi’, JURSE 2022 Online Lounge, Medellin, Colombia (February 2022).

‘Application of GIS Technology for Cultural Mapping: The Case of Havelis in Shahjahanabad’, Sahapedia’s #CultureForAll Online Conference on Cultural Mapping (September 2021).

‘Geographical Information Systems: Perspectives and Applications’: online presentation in **‘ECO-logs 1.0 – Exploring Socio-ecological Resilience in the Global South’**, Kamla Raheja Vidyanidhi Institute for Architecture and Environmental Studies, (March 2021).

Nizamuddin in Delhi. The consultant was responsible for:

- Translating all panels and caption from English to Hindustani.

[GIS Consultant, Park Information Management System | January 2019 – August 2019](#)

After Sunder Nursery was opened as a public park in February 2018, AKTC sought to create a baseline to evaluate its impact on the surrounding neighborhoods. The consultant supported AKTC by:

- Supervising primary surveys and visualizing the collected data through thematic maps.

[GIS Consultant, AKTC Project Site Tree GIS | August 2015 – February 2016, February 2012 – January 2013](#)

The Consultant prepared a tree database for Sundar Nursery which was later extended to the entire AKTC project site i.e. Humayun’s Tomb Complex and Batashewala Complex in the subsequent phase. This work involved:

- Structuring the existing database
- Updating it through physical surveys
- Creating thematic maps

[GIS Consultant, Hazrat Nizamuddin Basti GIS | May 2014 – April 2015, May 2013 – December 2013](#)

As part of AKTC’s Humayun’s Tomb – Sundar Nursery – Hazrat Nizamuddin Basti Urban Renewal Program, the Consultant undertook the task of creating a socio-economic GIS to visualize various development indicators for Kot Mohalla, one of the neighborhoods of Nizamuddin Basti. This work was extended to the entire Nizamuddin Basti during the next phase. This work involved:

- Spatial adjustment of CAD drawings of the Basti in a GIS environment
- Cleaning-up the resultant shapefiles
- Joining of socio-economic data of the Basti from excel to shapefiles
- Creating summary tables
- Producing thematic maps

University of Sussex – Jawaharlal Nehru University – University of Wuhan Research Collaborative

[Urban Planning/GIS Consultant, Inclusive Green Infrastructure for Urban Well-being | January 2020 – March 2022](#)

This British Academy funded project examined green infrastructure (GI)

‘Waterbodies and their Linkages with Resettlement Colonies and Informal Settlements’: presentation in the **‘Online Roundtable on Sustainable Urban Infrastructure’**, GIZ (March 2021).

‘Data Integration and Management - Linking Datasets to GIS’: online webinar for the **‘Puducherry Smart City Project’**, (June 2020).

‘Of Urban Planning and some Unplanned Narratives’: 3rd Annual Environmental Studies Symposium, Department of Physical and Natural Sciences, FLAME University, Pune (January 2020).

‘Planning through Space and Time’: **‘Resilient Cities: A Landscape Approach’**, a workshop organized by the School of Planning and Architecture, Bhopal (October 2017).

‘Re-imagining Agra: Fluvial Geographies of Historic Cities’: paper read at the 7th World Archaeological Congress, Amman, Jordan (January 2013). (Co-authored with Ms. Shahena Khan, Visiting Faculty, Department of Architectural Conservation, SPA, New Delhi.)

‘Urban Development and Climate Change: A Case of Bangalore’: paper presented in **‘Responding to Climate Change: UK-Indian Perspectives’**, SPA, New Delhi (August 2010).

‘Emerging Urban Regions and Regional Inequalities in India’: paper presented at the **‘41st Annual Regional Science Conference’**, Bomdila, Arunachal Pradesh, (March 2010). (Co-authored with Prof. Dr. N. Sridharan, Director, SPA, Bhopal.)

in peri-urban India (Ghaziabad, National Capital Region) and China (Wuhan), agriculture and its role in the livelihoods and health of urban and peri-urban residents. The project team developed a web-application with land use mapping and scenario building capabilities to explore the neglected impacts of mainstream development trajectories on peri-urban GI, and to support dialogue on the potential to preserve GIs and their ecosystem service benefits as urbanization proceeds. The method employed deep learning techniques to classify very-high resolution google earth imagery and to interpret formal and informal landscape features over time and analyze the implications of infrastructure interactions on diverse livelihoods. The mapping team also created story maps to link information on the lived experiences, diverse perspectives, and future aspirations of affected communities to the landscape mapping tools.

Sustainable Environment and Ecological Development Society (SEEDS), New Delhi

[GIS Consultant, Artificial Intelligence for Humanitarian Action: Disaster Forecasting and Planning | March 2020 – February 2021](#)

This Microsoft Humanitarian Grant project envisaged ‘hyper-localize’ response to disasters and aimed to change the way neighborhoods use disaster related information for making critical decisions. With Puri and Mumbai in India as case cities, the consultant provided technical assistance to the project team by:

- Preparing training data and developing risk scores which ultimately fed into a Machine Learning model for neighborhood-specific disaster alerts and assessed risks right down to the dwelling unit level.

[GIS Consultant, DFID – Start Network Disasters and Emergencies Preparedness Program \(DEPP\) Labs | December 2017 – May 2018](#)

A collaborative effort between SEEDS and Centre for Research on the Epidemiology of Disasters (CRED), University of Louvain, Belgium, this project sought to understand the spatial pattern of disasters that occurred between 2000 and 2017 in India, Bangladesh, Nepal and Myanmar. The consultant was responsible for:

- Mapping disaster related data of these countries
- Creating thematic maps of various disasters

[GIS Consultant, Safe School Program | May 2017 – August 2017](#)

This project sought to make schools - exposed to multiple hazards in Delhi - safer through a comprehensive school safety approach. It investigated various aspects of disaster management, assessment of hazards, training and capacity building of teachers, students and school administration and carrying out mitigation measures for school safety.

Centre for Urban and Regional Excellence (CURE), New Delhi

GIS Consultant | March 2019 – March 2020

CURE has been supporting ULBs across India be developing online spatial analysis tools to improve urban governance. As part of this the consultant was responsible for:

- Conceptualizing these tools.
- Creating and testing offline working models
- Preparing a manual to explain the working of these tools to municipal functionaries

Urban Planning / GIS Consultant, Slum GIS for Agra | July 2011 – April 2014

CURE has been supporting the Municipal Corporation of Agra in developing a vision plan for a slum-free city. As part of this initiative, the consultant was responsible for:

- Creating a spatial database covering all 400 slums in Agra.
- Analyzing patterns related to land ownership, housing conditions, infrastructure, and livelihoods.
- Analyzing patterns related to land ownership, housing conditions, infrastructure, and livelihoods.

GIS Expert, Rajiv Awas Yojna (RAY) Technical Cell, Urban Development and Housing Department, Government of Sikkim, Gangtok | February 2012 – February 2013

CURE was appointed as the Project Management Unit (PMU) by the Urban Development and Housing Department (UDHD) of the Government of Sikkim to facilitate the implementation of RAY in Gangtok. The consultant was part of the PMU as the GIS expert for overall supervision of geo-spatial mapping of Gangtok.

Urban Expert, Implementing RAY for making Indian cities slum free: Issues in accessing land for supply of affordable housing, Raipur | May 2011 – July 2011

Based on a study of two cities - Raipur and Tirupati - the consultant examined the challenges in providing housing for all with legal property titles under RAY. The consultant provided technical assistance in collecting data, interviewing stakeholders, analyzing various planning related documents and spatially analyzing squatter settlements to deepen the understanding of land issues for creating affordable and sustainable housing for slum dwellers under RAY.

Centre for Science and Environment (CSE), New Delhi

Urban Planning/GIS Consultant, Support to National Mission for Clean

Ganga (NMCG) – Preparation of City Sanitation Plans (CSPs) for eight cities in Ganga basin | August 2016 – October 2018

In its effort to rejuvenate Ganga, CSE provided support to NMCG by assisting eight cities across Uttar Pradesh, Bihar and Bengal in preparing CSPs. The consultant was responsible for providing technical assistance to CSE by creating spatial databases and thematic maps for all these cities.

Deutsche Gesellschaft für Internationale Zusammenarbeit (GIZ) GMBH

Data Management Consultant for Support to Ganga Rejuvenation | September 2016 – December 2017

As part of GIZ’s support to NMCG (National Mission for Clean Ganga) to rejuvenate the Ganga, this initiative aimed at enhancing data management, spatial analysis and knowledge sharing for more effective river basin management and planning. The consultant was responsible for:

- Assessing existing technical capacities.
- Developing recommendations to establish an institutional SDI (Spatial Data Infrastructure) in form of ‘Ganga Knowledge Centre’ within NMCG.

GIS Consultant for Support to the National Urban Sanitation Policy – II | April 2016 – November 2017

As part of this initiative, GIZ provided support to Kochi Municipal Corporation in implementing non-conventional wastewater system. The consultant was responsible for:

Designing a GIS-based water discharge register for 800 households in Kochi.

- Preparing ‘Standard Operation Procedure’ (SoP) document for planning and implementing similar sanitation systems.

Data Management Consultant for Advice and Knowledge Exchange on River Basin Management | October 2015 – January 2016

As part GIZ’s support to NMCG the consultant was responsible for:

- Mining, cleaning and streamlining the spatial data on Ganga basin available with NMCG.
- Preparing a SoP document for future spatial data collection and storage endeavors.

Data Management Consultant for City Sanitation Plan (CSP) implementation in Kochi, Raipur, Shimla and Tirupati | October 2013 – March 2014

As part of GIZ's support to these cities in planning and implementing CSPs, the consultant was responsible for:

- Collating and documenting sanitation related spatial/non-spatial datasets.
- Analyzing them for gaps and streamlining for future use.

GIS/Urban Planning Consultant for Rajiv Awas Yojna (RAY) and City Sanitation Plan (CSP) implementation in Raipur and Tirupati | May 2012 – April 2013

RAY for slum dwellers and urban poor was a mission mode program launched by the then Ministry of Housing and Urban Poverty Alleviation (MoHUPA), Government of India (GoI). As part of GIZ's support to these cities and their respective states to achieve the goals set under RAY, the consultant was responsible for:

- Collating existing spatial and non-spatial datasets for these cities.
- Assessing them for content, quality, level of detail vis-à-vis the requirements of RAY.
- Other background research related to urban poverty.

Resource person for conceptualizing, planning and designing a four-day long workshop including a series of public events on the river Yamuna – 'Yamuna Katha' - in Delhi between 11th and 15th October 2011 | August 2011 – October 2011

Yamuna Katha was a collaborative effort to understand the river-city dyad; the relationship between the river, the people, the flora and the fauna, bringing to a common zone, representatives of various stakeholders directly or indirectly connected to the river. The core group consisted of a river specialist, two educationists, a social scientist, a historian, a *hathi wala*, a fisherman and his family, and a farmer. They undertook travels to the banks to reflect on the river collectively. Each day of the journey brought in new 'passengers' – people who accompanied the core group only for that day – and enriched the journey with their perspectives. Together they created a narrative to explore a common future for the river.

GIS Consultant, Making Community Toilet Complexes Work – A step towards open defecation free Delhi | July 2010 – April 2011

GIZ-ASEM (Advisory Services in Environment Management), aided Indcare Trust in developing an efficient business model for operating and maintaining 439 public toilets in the city. The consultant supported this endeavor by:

COURSES TAUGHT AT SPA DELHI

Advanced GIS: M. Plan (Regional), Winter Semesters 2025, 2024, 2023, 2022 and 2021.

GIS Advanced (Heritage Application): M. Arch (Conservation), Winter Semesters 2025, 2024, 2023, 2022, 2021 and 2020.

Spatial Data Infrastructure: M. Plan (Regional), Autumn Semesters 2025 (ongoing), 2024, 2023, 2022, 2021, 2020, 2013, 2012 and 2011.

Fundamentals of GIS: M. Plan (Integrated), Autumn Semesters 2025 (ongoing), 2024, 2023, 2022, 2021 and 2010.

Fundamentals of GIS: M. Arch (Conservation), Autumn Semesters 2025 (ongoing), 2024, 2023, 2022, 2021, 2020 and 2009.

Fundamentals of GIS: M. Plan (Housing), Autumn Semesters 2025 (ongoing), 2024, 2013, 2011, and Winter Semesters 2024 and 2012.

Planning Information Systems: B. Plan, Autumn Semester 2013.

M. Plan (Regional) Studio: Winter Semesters 2010 and 2011 and Autumn Semesters 2009, 2010, 2013 and 2020.

Computer Applications in Architecture: B. Arch, Winter Semester 2024 and Autumn Semester, 2023.

- Building a comprehensive database of the toilets
- Mapping other relevant urban layers such as municipal wards, master plan and zonal plans
- Developing a management toolkit to improve service delivery

[Consultant in Promoting Tourism, Creating Livelihoods: A Toolkit for Cleaning the Ghats of Varanasi | May 2010 – July 2010](#)

As part of GIZ-ASEM's support to urban local bodies in preparing CSPs a simultaneous approach of developing local area interventions for improving sanitation and solid waste management was attempted in Varanasi. This intervention looked at improving sanitary conditions along a select stretch of the ghats by exploring the link between sanitation, livelihoods, and tourism. The tasks included documentation of these three aspects; their archival research and mapping.

Forum for Organized Resource Conservation and Enhancement (FORCE) - GIZ

[GIS Consultant, Sanitation beyond Sewers, Waterbodies and their linkages with Informal Settlements | December 2014 – June 2015](#)

This project was a joint initiative between FORCE and GIZ's Indo-German Environment Partnership (IGEP) to understand inter-linkages between urban sanitation, the built environment and water management. The consultant was responsible for:

- Preparing spatial databases for Delhi's waterbodies and resettlement colonies.
- [Geo-spatial](#) visualization on a web-based platform.

TEACHING EXPERIENCE

Guest Faculty. Kamla Raheja Vidyanidhi Institute for Architecture and Environment Studies (April – June 2020) – Urban Design Studio

Guest Faculty, TERI School of Advanced Studies (September – December 2022) - Fundamentals of Remote Sensing and GIS for Urban Development

Course Creation and Faculty, National Institute of Defense Estates Management (NIDEM) (January 2022 to January 2023)

Visiting Faculty, School of Planning and Architecture, Bhopal (September 2021 to September 2022) – Fundamental of GIS for Landscape Architecture

Visiting Faculty, School of Planning and Architecture, New Delhi (April 2009 – December 2013, April 2020 to present)

RESEARCH GUIDANCE

Supervisor, M. Plan. (Regional), Department of Regional Planning, School of Planning and Architecture, Delhi (2024) Mondal, A., ***'Application of Geospatial Artificial Intelligence for Wetland Conservation: Case of Bhoj Wetland, Bhopal District, M.P.'***

Advisor, M.Sc. Spatial Engineering, University of Twente, the Netherlands (2022) Rajan, V., ***'Evaluating Morphological Continuity of Shahjahanabad'***.

Member, Ph.D. Advisory Committee, Department of Social Work, University of Delhi (2011) Jamil, G., ***'Positionality, Spatiality and Identity: An Urban Study of Muslim Community in Delhi'***. (Published as ***'Accumulation by Segregation: Muslim Localities in Delhi'***, Oxford University Press, 2017).

TRAINING PROGRAMS CONDUCTED

Hands-on with QGIS: As part of the **One Week Faculty and Professional Development Program on Application of Geo-informatics for Planning**, conducted by Department of Regional Planning, SPA, Delhi (January 2025).

Mapping Basics – Geo-information Technology for Urban Design: 4-day training program for Department of Architecture, Siddhganga Institute of Technology, Tumkur (January 2025, and December 2023).

Role of Geo-Informatics in Mapping Estate Boundaries: 5-day training program for IDES officers (January 2023, June 2022, and February 2022).

Role of Geo-Informatics in Mapping Estate Boundaries: 5-day training program for Sub-Divisional Officers (SDOs) of Indian Defense Estates Services (IDES) (September 2022, and April 2022).

Geo-Informatics for Mapping Cultural Heritage: 5-day GIS training program as part of **'6 weeks summer internship program: Mapping of Heritage Resources of Shahjahanabad'**, Indira Gandhi Delhi Technical University for Women, June 2022.

Role of Geo-Informatics in Mapping Estate Boundaries: 5-day training program for Computer Programmers of Indian Defense Estates Services (IDES) (May 2022).

Mapping of Estates' boundaries using Remote Sensing and GIS: 2-week online training program for SDOs of IDES conducted along with National Remote Sensing Centre (NRSC), Hyderabad (January 2022).

Basic and Intermediate QGIS: As part of the **Faculty Development Program / Quality Improvement Program on Geo-informatics Application in Planning**, conducted by Department of Regional Planning, SPA, Delhi (December 2020).

Basics of GIS and Remote Sensing for Water and Sanitation: Online training conducted for CSE (October - November 2020).

Mapping Basics Online: Introduction to GIS & Remote Sensing using open-source tools (June 2020).

Introduction to GIS & Remote Sensing: Introductory GIS & Remote Sensing training as part of **'Green Skill Development Program'** (GSDP) Course **'Green Belt development for Industries'** conducted by SPA-ENVIS Resource Partner (March 2020).

Mapping Basics: Introduction to GIS and Remote Sensing using open-source tools (February – March 2020).
